Why don't you have
Beautiful CLEMATIS
in your Garden?

THEY ARE EASY TO GROW

Clematis looks delicate but actually is not too difficult for anyone to grow. It needs the support of a trellis, fence, stump or the like, for the vines grow 6 to 15 feet tall.

Provide a rich, light, well-drained soil for Clematis. Well-rotted manure or commercial fertilizer will supply the necessary plant food. A ground cover or summer mulch is advisable in order to keep the root area cool. Leaves, straw or peat moss make good winter protection.

\$1.00 each 3 for \$2.50
6 for \$5.00 • 12 for \$10.00
